

Video Conferencing

Both the Buffalo and Rochester Clerk's Offices are equipped to accommodate video conferences. The technology is capable of initiating or receiving calls to and from any compatible system. The priority use of the video conferencing equipment is as follows:

1. Prisoner pre-trial proceedings;
2. Appellate oral arguments; and
3. Judicial officer meetings and other court meetings.

The video conferencing equipment may be made available for conferencing when not in use, provided the use of equipment is for court-related business.

The Office of the Clerk administers the video conferencing program for the District Court. Questions regarding the use of the video conferencing equipment must be directed to the Video Conferencing Coordinators. The Buffalo Coordinator may be reached at (716) 551-4211 and the Rochester Coordinator may be reached at (585) 613-4000.
